

*Harmonics Suppression System by
Harmonics Limited.*

“Alvaro has been a resource for power quality issues and now with NEC2002, Alvaro is a guest lecturer for our electrical continuing education classes.”

Albert G. Cisneros, President
Certified Trainer Provider
Cisneros Electric & Training Group

“I have found the products that Alvaro promotes to be reliable and true to their performance specifications.”

Zero Sequence, Harmonic Mitigating Transformer by Olsun Electrics installed at the San Antonio International Airport.

A MARKETING & SERVICE CO. —

SOLUTIONS FOR POWER RELATED PROBLEMS

A Marketing & Service Co. is a service-oriented distributor of electric power distribution & electronic products. We specialize in power quality and surge suppression technology.

We supply needs assessment and full solutions for:

- Power quality related problems
- Transient Voltage Surge Suppression (TVSS) devices for electrical power distribution systems (<600v)
- Harmonic Mitigation (magnetics, passive filters, & active filters)
- Uninterruptible Power Systems (UPS) 400va Single Phase to 3000kva Three Phase
- Automatic voltage regulators
- Data system surge protection devices
- Grounding systems design & products
- Lightning dissipation systems design & products
- Soil resistivity tests
- Harmonic analysis test

ABOUT US

A Marketing & Service Co. was founded in 1986. Originally, we provided technical sales assistance for maintenance repair and overhaul (MRO) in the industrial and commercial sectors. Our niche products are the power quality products required to maintain a clean electrical environment. This is necessary to achieve production results from the newer micro-processor-controlled equipment. Since 1986, we have expanded our capabilities to include consulting, sales, and service on a full range of industrial systems.

A Marketing & Service Co. solutions are used in schools, hospitals, office buildings, call centers and data centers, and automated manufacturing facilities throughout South Texas and Mexico.

Your solution may be simple or complex, yet is it always application sensitive. We offer our knowledge backed by our 17 years of in-field service, further supported by engineers dedicated to the proper application of the solution products.

Our goal is to deliver the power-related solution(s) to meet your production goals, within your budget.

LEA International TVSS continues three decades of excellence with the Triton 300.

“I have worked with Al Rodriguez for the last three years, and have found Al to be very reliable and consistent in his dealings with me and World Savings. My business experiences with Al have shown me that he is very thorough and persistent with research and support of the products, projects, and goals we have worked on together.”

Asst. Vice Pres., Facility Operations**

OUR PRODUCTS

TVSS	Cat. “A” “B” & “C”, Panel type Integral, Extension & External & Cat. “A”120v Power Filters
Transformers	Dry Type, Harmonic Mitigating, Hazardous Use, K-Rated, Zig-Zag
UPS	400va 120v plug-in type up to 3000kva 480v or 208v, 3 Phase
Harmonic Filters	Magnetics, Passive, Active
Grounding	Electrolytic Ground Rods & Low Resistance Back-Fill
Lightning Dissipation	Multi Point Discharge Products, Lightning Rods. System Design and Component Parts
